Research & Design

Adobe XD, Codepen, DEV.to, Figma, Framer, Instagram, Stack Overflow, Twitter / X

Management & Tools

Apollo, Apple, Atom, Azure, Bitbucket, Cloudflare, Debian, Discord, Discord.js, Docker, Firebase, Git, GitHub, GitHub Actions, GitLab, Google, Google Workspace, Heroku, IDEA, IPFS, Jira, Linux, Netlify, Nginx, npm, Postman, Raspberry Pi, pnpm, Replit, Slack, Trello, Ubuntu, Vercel, Windows, Workers

About Me

I started my journey as a computer programmer in 2015, when I started exploring the world of website development. Soon after, I founded a virtual small business, now renamed **Dango Web Solutions**, to house my creations. Since then, I have made websites for my many clients and have earned and maintained a 5-star rating for my website creation and programming skills. Now, a full stack web developer with well over 1,000 hours of recorded experience, I aim to complete college at **Rensselaer Polytechnic Institute** (RPI) preferably majoring in computer science, computer programming, or bio/engineering to live my passions.

Experience

Dango Web Solutions Founder 2015 — Present | New York, USA

- **Dango Web Solutions** is a web services provider and reseller offering free and discounted web hosting, websites, CDN, and more mainly to startups, students, and educational institutions.
- We have had a positive impact on educational organizations, religious organizations, startups, small business, and many more who thank us for helping with setting up and publicizing their presence online.
- Through **Dango Web Solutions** I have earned a 5-star rating for every website created for my timely work, programming skills, and overly helpful support.

Admin-Host / LENS Public Relations 2024 — Present | New York, USA

- **Admin-Host** is a white-label provider group offering various hosting services to professional users through participating hosts. Their services collectively reach over 1,000 unique users daily, with a diverse range of professionals and organizations relying on their hosting solutions.
- I run public relations and maintain **Admin-Host's** codebases as well as help to develop various services with their team such as **LENS**, an easy-to-use secure user authentication service.

Nyxa Hosting Head of Human Resources 2022 — 2024 | United Kingdom

- At **Alfie Web Solutions / Nyxa Hosting**, I was responsible for hiring well-trained individuals for open positions, as well as managing current team members.

Erebus Hosting Chief Technology Officer 2023 — 2024 | Ontario, Canada

- During my time at Erebus Hosting, I oversaw all technology infrastructure of the hosting provider to ensure data security and ease-of-use for clients.

Mintlify Open-Source Contributor San Francisco, California | 2024 — Present

Paperchase Crafts Website Developer New York, USA | 2015 — Present

HilariousHaHa Public Moderator 2023 — Present

VistaCloud Customer Support Agent Connecticut, USA | 2024 — 2024

TranzHex Customer Support Agent Tamil Nadu, India | 2024 — 2024

FlusterHost Co-Founder Mississippi, USA | 2023 — 2024

Lumixle Website Developer 2023 — 2024

Byte Development Developer 2021 — 2024

IceHosting Administrator Bulgaria | 2021 — 2024

GVP TECH Administrator India | 2021 — 2024

Research

Breast Cancer

Summer 2024, New York, USA

- I participated in Epidemiology research at the Adelphi University ASIME Epidemiology Summer Research Program. Our group of four high school students focused on developing an early screening tool for Breast Cancer using Machine Learning. Our goal was to effectively determine whether or not someone has breast cancer based on certain medical features. The screening tool can serve as an affordable, reliable way to screen for breast cancer at an early stage. We worked on our project for a month, trying as much as we could to perfect our AI model. Not only did we have fun in the struggling of creating the model, but I believe that this project we have worked on can make a positive impact in the world and improve the lives of women and men with Breast Cancer everywhere.

Key Extracurriculars

Robotics

2023 — 2025, New York, USA

- I have contributed to several robotics teams at **Adelphi University's STEP Program** to build, program, drive, and fly many robots and drones. I started on **VEX Robotics** team **8880B** and advanced to team **8880A** while I mentored younger incoming team members from teams **8880B** and **2493A** ("Team C"). Over my years with the group, I have contributed to a total of 7 robots and 2 drones. We constructed these pieces with metal and 3D printing, and programmed them in **C++** and **Python**. We met most Friday nights and Saturdays, but as we were comprised of students from many different schools in the area we could not meet for longer than a few hours a week. We won many awards, including the **VEX Create Award** and **VEX Judges' Award**.

The Southern Bell

2019 — 2025, New York, USA

- I was part of my school's newspaper, The Southern Bell, from the start of middle school to the end of high school. Over my 6 years with the club, I wrote numerous articles and made puzzles for the newspaper's every issue. In addition, I designed, developed, and managed the newspaper's website, which is showcased at island-wide conferences each year. I was awarded a technology award in my earlier years with the club.

Varsity Sports

Honor Societies

Volunteering Groups

Volunteering

Summer Camp

Summers 2022 — 2023, New York, USA

- During the summers of 2022 and 2023 I volunteered at the **Valley Stream 13 School District's** Summer Camp for Kindergarten through 7th grade students as a counselor. Every day, we planned and managed various daily activities for the students. I was recommended for 2 years and for a job at the program.

Featured Projects

Virtual Checker

Sep 23, 2024 — Aug 11, 2025, ~300 Hours

- **Virtual Checker** is an AI-powered homework checking system designed to streamline the educational experience for both students and educators. This cloud-hosted platform supports a variety of course structures, allowing for the categorization of courses, periods, segments, and questions. Key features include the capability to assess the correctness of responses with statuses for correct, incorrect, and pending answers, as well as options for multi-selecting and response polling (receiving responses as soon as they come in). Students can input mathematical expressions, enter set data, and use matrices for comprehensive answer evaluation. The system provides instant AI response matching and correct and incorrect answer generation, with the ability to flag responses for further review. Additional functionalities include notifications, response timestamps, tracking time taken to complete questions, and downloadable course syllabi, among many other features aimed at enhancing user interaction and assessment accuracy. Not all functionality such as specific options, dropdowns, modals, etc. are shown in the screenshots below.

The Southern Bell

Sep 29, 2023 — Jul 30, 2025, ~150 Hours

- **The Southern Bell** website serves as a comprehensive news portal for **Valley Stream South High School**, offering newspapers, articles, artwork, polls, and more. Its newspapers feature a well-organized collection of articles categorized by tags for easy navigation. Each newspaper and article includes an appropriate title, author information, dates of creation and editing, social sharing options, image sliders, and enhanced visibility for the first letter of titles. The artwork section provides students with the opportunity to upload their creative works, much like the article submissions. Each author is provided with a dedicated public sharable profile page. Interactive polls are available to engage the community in a simple, enjoyable, and anonymous manner. **The Southern Bell** uses a CMS for no-code website content management.

LENS Authentication

Dec 15, 2024 — Jun 1, 2025, ~50 Hours

- **LENS (Login Encryption Network System)** is an innovative user authentication solution designed for participating **Admin-Host** hosting providers, streamlining the authentication process while ensuring enhanced security for both the user and the host. By utilizing **LENS**, hosts can authenticate their users, integrating seamlessly with their internal systems. **LENS** also offers an opt-in white-label user management dashboard, enabling hosts to customize user interactions and communications, including personalized emails. The white-label dashboard, which requires hosting on Admin-Host servers for security protocols, permits extensive customization to align with the host's branding and operational needs.
